TRACKING

> TAKE CONTROL OF YOUR ASSETS  
AND COMPLIANCE

*Secure Cloud-based Asset Management Solutions*

## > IDENTIFY, MARK & TRACK WITH MILITARY-GRADE ENTERPRISE SOLUTIONS

For over 24 years, A2B Tracking has pioneered military-grade solutions for tracking and managing critical assets and inventory for government agencies and commercial businesses. We'll help your enterprise take control of your assets and record keeping by providing you our secure, cloud-based Asset Management software platform to achieve 99% inventory accuracy or better. A2B Tracking integrates RFID and advanced barcode technologies to improve asset visibility, accountability and sustained audit readiness for all types of assets.

For government property managers, A2B Tracking's Government Property Management Software, UC! Web™, was specifically designed to enable total compliance to FAR 52.245-1 (Government Property), along with compliance to military asset and shipment identification standards while providing automated data exchange to WAWF, iRAPT, IUID Registry and PCARSS. The UC! Web platform is a FedRAMP secure, versatile asset management solution designed to automate your lifecycle asset management events – from acquisition to disposal. A complete lifecycle asset management platform with integration modules to Oracle, Deltek Costpoint and other ERPs.

### *what sets A2B Tracking apart*

**World Class Asset Tracking:** Our powerful asset tracking engine can achieve 99%+ inventory accuracy while performing inventories at a rate of 30x faster using RFID and advanced barcode.

**Military Proven:** Our secure cloud-based asset management solutions using RFID and advanced barcode are more intuitive due to use of tablet and smartphone technology. Our system can be deployed and integrated faster than other systems with web services APIs. We're military-tested and proven in the most complex and harshest of environments in places such as Kuwait and Afghanistan.

**Deep Expertise:** We have a 24-year track record of enabling government agencies and commercial businesses of all sizes to manage assets, improve inventory accuracy, eliminate loss, achieve sustained audit readiness, and maintain full compliance.

**All-in-One Platform:** A complete lifecycle asset management software platform to track and manage your assets from cradle to grave.

**IUID and RFID Tags:** A2B Tracking manufacturing facilities will create and ship your asset tags to your door while uploading tag data to your A2B Tracking database which saves significant time on your tagging and commissioning process.

## > MILITARY-GRADE ASSET MANAGEMENT SOFTWARE THAT INTEGRATES WITH YOUR ENTERPRISE SYSTEMS

Our enterprise-class software, UC! Web™ lets you manage corporate assets and government property record keeping, create 1D and 2D Data Matrix barcodes and durable RFID tags, and track, ship and update asset data to internal systems of record and external government systems. You can integrate all of this data with your enterprise systems, using our comprehensive software API to integrate with ERP systems or legacy databases. Track a uniquely identified item or any asset in your inventory – all from one system.

- > Create, scan and import asset data
- > Print and validate unique identifiers
- > Track all government shipments
- > Output to a broad range of marking devices
- > Assign your item to a contract type and number
- > Perform inventory control with reconciliation
- > View a history of item movement, condition and more
- > Print unique shipping labels from case to pallet
- > Automate data exchange to WAWF, iRAPT, IUID Registry and PCARSS
- > Achieve mobility with tablets and smartphones

- > Serialized item-level reporting
- > Scan to move assets or transfer to a new location
- > Manage asset locations and custodians
- > Support embedded relationship management
- > Implement multi-level location management

## > ACCURATE ASSET IDENTIFICATION FOR TOTAL ACCOUNTABILITY

Accountability begins with accurately identifying your assets. We specialize in identifying unique assets, meeting industry standards set by the most demanding organizations and businesses. The first step is to create a unique identifier that is validated and verified to ensure that each asset is correctly marked and stays that way for its entire lifecycle. With our automatic identification and capture technology, you can create or scan unique identifiers using both one-dimensional (1D) and two-dimensional (2D) barcodes, as well as Radio Frequency Identification (RFID) all in one system.

### *asset tags on demand*

A2B Tracking gives you control over the technology, design, material, adhesive, and delivery time of your labels, tags, and plates. We use today's most advanced laser etching, engraving, and cutting technology, along with high-quality thermal transfer printing systems, to produce labels and plates that withstand the harshest conditions. A2B Tracking can also provide you IUID or RFID labels and plates. Made within our modern manufacturing facilities, we create custom label and plates for any asset or environment.

## > ADVANCED HARDWARE SYSTEMS PRE-INTEGRATED FOR YOUR CONVENIENCE

With A2B Tracking, you'll find everything you need to meet your asset management and compliance objectives all under one roof. We offer step-by-step professional guidance through the equipment selection process, help with installation, and remain at your service whenever you need support. We partner with some of the industry's most trusted barcode, RFID and mobile computing equipment suppliers to deliver a solution that may include any or all of the following products to meet your specific goals:

- > Laser etching systems
- > Mobile computers
- > Tablets
- > Barcode scanners and imagers
- > Barcode validators and verifiers
- > Thermal transfer label printers
- > Fixed and mobile RFID readers

## > MAKE THE MOST OF TECHNOLOGY

Technology should make your work easier, not get in your way. Our comprehensive cloud-based application stores your data in a secure, centralized database, enabling you to work from multiple locations anywhere in the world, so your data and reporting is always accurate and up-to-date. You can access our application from the web, mobile computer or tablet. Plus, the combination of a browser-based user interface and integrated mobile computing lets you access UC! Web™ quickly and easily, and instantly scan items anytime, anywhere.

With our Software as a Service (SaaS) offering, we host the software for you, providing all software updates so your IT overhead is minimized while your enterprise leverages all the benefits that the latest technology offers. Or get a self-hosted system on-premises for complete control.

## > SEAMLESS APPLICATION INTEGRATION

A2B Tracking enables you to connect software applications and external databases, providing continuous workflow so your end users can work seamlessly with minimal training. Our flexible web services Application Program Interface (API) provides access to our application data within your enterprise user interface. We provide an electronic submission interface within our application as well, so you can transfer data to and from WAWF, iRAPT, IUID Registry, and PCARSS in compliance with industry standards.

## > DATA MANAGEMENT MADE EASY

Your results are only as good as your data. Our strategy is to ensure that you get accurate data from the start, delivering one version of the truth throughout your organization and embedding it into your business processes. We give you the tools you need to capture data into your system, reduce errors, and ensure that you comply with industry standards, all from a centralized database. Track detailed asset information down to the item level so you can put your hands on any item at a moment's notice, from assembly and acquisition through shipment and disposal.

## > THE ADVANTAGE OF A COLLABORATIVE PROGRAM PARTNER

Taking advantage of industry-leading asset management products and services that benefit your enterprise begins with a collaborative program partner who understands your objectives, helps develop your asset management strategy, and implements the right solution for your operation. Whether you want to leverage your investment in existing applications or acquire new software, we work closely with you to evaluate your business processes and recommend the most effective technology and workflow to help achieve your goals.

### *marking and data capture*

Marking items, reducing errors, and building an accurate inventory can save both time and money. When your available time and personnel are simply not enough to mark and register all your assets on your own, A2B Tracking field teams can mobilize at a moment's notice to get the job done for you, anywhere. We travel around the globe to mark your items with the utmost precision and ensure high-integrity data capture – one of our most valuable services.

### *plan, implement and train*

Your project plan should be as unique as your program needs. A2B Tracking can help develop a comprehensive plan for identifying your assets, creating unique item identifiers, and marking items, along with validation, verification, and electronic submission. We get you up and running by installing the right equipment and software, and training your personnel. And we follow up with product and technology updates to keep your program output and your ROI at optimal levels.

## > A DEDICATION TO CUSTOMER SERVICE

When you speak with any of our hundreds of users, chances are you'll hear raves about our customer service and support. A dedication to technical support and customer education is integral to our mission. No matter what the issue, we make complex processes simple.

You can access support troubleshooting by phone or online. Our certified technicians can also link directly to your workstation to solve a problem via remote access technology. And when you register with our User Community, resources such as software downloads, technical manuals, technology white papers, and a searchable knowledge base are immediately accessible.

## > IT'S EASY TO GET STARTED

Find out how we can help your organization track your assets effectively and ensure your regulatory compliance. Call today to speak with one of our experts. We'll discuss your requirements and how you can achieve them. Whatever your goals may be, we can set up a complete solution that leverages your existing data and integrates seamlessly into your enterprise.

> MILITARY GRADE TECHNOLOGY.  
PROVEN PARTNERS.  
A2B TRACKING.

With more than 3,000 tracking installations around the world, A2B Tracking serves a broad range of commercial enterprises and public sector organizations, from small and large scale manufacturers to government agencies and the military. The U.S. Department of Defense entrusts us as its largest Item Unique Identification (IUID) program partner and its leading provider of turnkey systems designed to accurately identify, mark, and track mission-critical assets. Whatever your mission may be, we'll work with your enterprise to ensure that every item leaves the dock on time and in full compliance.

When you need reliable identification, marking and tracking of critical assets anywhere, anytime... we're on it.

207 Highpoint Avenue, Portsmouth, RI 02871 800.733.7592
